

I would like to comment on the NAB's petition 04-160. As the consumer and end user of products and services provided to me in America I feel it is my right to be able to purchase and use services provided to me in America. I find in appauling that the NAB wants to control every media aspect of my life. They want to be able to control what I may watch and now listen to, even if it is of greater quality and content than that provided. They did this to me by taking away my RIGHT to view television stations that were located in New York city stating that since I did not live there I did not have the right to view those stations. This in my opinion is CENSORSHIP and should be challenged under the first amendment right. If I can read a newspaper from Seattle, New York, or DC why can I NOT watch or listen to stations, or programming that are from other localities? That is the question, I am sick and tired of a "MEDIA CLUB" contoling my options, I feel like I am voting in a Russian Election. I beg the FCC to completely disregard the NAB's petition 04-160 in order to serve the consumer, that is what the FCC was meant to do, protect the consumer, any other discision would not be in the American Consumer's best interest.
